

Webroot SecureAnywhere® Business – Mobile Protection

Smarter security for today's mobile workforce

In a recent survey, employers indicated that 95% of their employees are using mobile devices for work, with 61% of the employees using their own personal devices.¹ Quick and easy ways to conduct business on the go are gaining momentum; so is the need for effective security for mobile devices used in your organization.

Like laptops, mobile devices are susceptible to digital attacks. More and more users rely on smartphones and tablets to manage their personal and business data, opening up an attractive new target for cybercriminals.

While infection rates and risks vary widely by platform, mobile malware is growing exponentially for both Android™ and iOS® devices. The total threats to Android devices analyzed by the Webroot Mobile Research team rose 384% from 2012 to 2013.²

In addition to cyber-attacks, mobile devices are highly vulnerable to theft and loss due to their size and portability. Although they can help maximize employee productivity, managing and securing these devices presents a unique challenge for IT administrators.

Webroot SecureAnywhere® Business Mobile Protection secures devices from malware, malicious websites and app hijacks, while protecting corporate and user data against accidental loss or theft. Leveraging cloud security intelligence, Webroot SecureAnywhere Business Mobile Protection requires no on-premise management hardware or software. Instead, the security status of mobile devices is visible and under control via the Webroot SecureAnywhere Business Management Console website. Administration of mobile devices, PCs and network endpoints is simple. Webroot SecureAnywhere Business Mobile Protection is designed as a low resource usage solution, keeping operational costs down and device performance optimal. It minimizes battery, bandwidth and memory usage, and is always up to date.

QUICK FACTS

- » Comprehensive protection covering malware, web browsing, identity, phishing attacks and data theft
- » Lightweight client runs in the background and scans without interrupting user activity
- » Intuitive management website to manage mobile devices and other endpoints from anywhere
- » Market-leading defense against mobile threats powered by Webroot® Intelligence Network (WIN) cloud security services
- » Lost Device Protection to remotely locate, lock, or wipe a lost or stolen device
- » Minimized device resource usage – won't slow down the device, hinder productivity, or drain battery power
- » Low bandwidth consumption for minimal mobile data/bandwidth usage

KEY BENEFITS

Management

Webroot SecureAnywhere® Business Mobile Protection is a cloud-based service that offers easy deployment and centralized management across mobile devices.

Web-based Administration

- » Intuitive, single point of control for visibility and reporting on mobile devices
- » Mobile dashboard provides instant status of devices needing attention
- » Ability to create custom and default group policies within the management console for over-the-air deployment
 - Policies may be created to cover:
 - Antivirus shields, Lost Device Protection, SMS Blocking, Secure Web Browsing and Password/Lock enforcement for Android™
 - General policies and Passcode enforcement, as well as Wi-Fi, VPN and approved email connections for iOS®
- » Execute remote lost device protection and general commands
- » Classifies the reputation of downloaded apps on all mobile devices
- » Customizable alerts via email or SMS

Cloud Simplicity

- » Quick updates that don't impede performance or productivity
- » Fast and easy deployment via email or SMS
- » No servers or on-premise infrastructure required, reducing capital expenditure and administrative cost
- » Built on scalable, redundant Amazon Web Services, ensuring your service can grow as your business grows

PROTECTION

Webroot SecureAnywhere® Business Mobile Protection delivers uncompromising defense against malware and web-based threats, ensuring your end users and your business data are protected.

Antivirus

- » Automatically scans applications and files for viruses, spyware and Trojans
- » Security shields block malware before it can install itself
- » Displays alerts when the device is vulnerable to attack, reducing the risk of a security breach
- » Helps organizations achieve regulatory compliance, such as PCI-DSS
- » Protects devices even when they are disconnected from the corporate network
- » Uses WIN cloud security services to deliver the most advanced threat protection

Secure Web Browsing

- » Automatically scans URLs to block fraudulent websites and other harmful content (within Chrome or stock Android browser)
- » Real-Time Anti-Phishing detects phishing sites up to 3-5 days sooner than any other service
- » Uses the proprietary Webroot URL content filtering and Web reputation data to protect against phishing attacks

Lost Device Protection Mechanisms

- » Quickly access and lock a compromised device, limiting corporate data loss and protecting end user privacy
- » Remote access allows you to access the management website from anywhere to execute remote commands, including:
 - Remote Lock. Locks the device if it's lost or stolen.
 - Remote Wipe. Wipes contacts, text messages, other personal information.
 - Scream locator. Sounds an alert to help find a device.
 - Device Locate. Provides a device's location on a map.
 - SIM Card Lock. Automatically locks the device when the SIM card is removed.

Application Inspector

- » Scans all applications and updates for threats
- » Identifies apps that cost money, access sensitive or personal information, track device location, and drain the battery

Call/SMS Blocking

- » Blocks unwanted calls and SMS messages, and automatically blocks SMS messages containing malicious URLs

PERFORMANCE

Webroot SecureAnywhere® Business Mobile Protection has a lightweight footprint, minimizes battery and network consumption and is backed by unrivalled technical support.

Battery & Network Monitors

- » Current and cumulative status of battery use by each app, updated every 24 hours without having to reboot device
- » Provides details of applications that access the network

Device Footprint

- » Light on both device memory and battery utilization
- » Automatically protects, scans and checks for security updates with minimal disruption

Technical Support

- » Integrated online ticketing through management website in over 65 languages
- » Live phone-based support available
- » World-class support with 95%+ satisfaction rating
