

CUSTOM COMPUTER SERVICES WE ARE YOUR IT DEPARTMENT

SHARESYNC AVAILABLE FROM CUSTOM COMPUTER SERVICES & MORE:

Meet ShareSync. It's a single tool for using, managing and protecting all your files.

ShareSync joins the forces of backup and file sharing to enable intuitive file management and mobility while helping to keep company data secure and protected. It eliminates the need for separate file backup by adding file sync and share features on top of cloud file backup.

ShareSync keeps files and folders in backed up and synced across virtually every device—and helps make it simple to share those files inside and outside of the company.

Business owners and managers will like ShareSync because the comprehensive security features, permissions-based sharing and 99.999% uptime mean there's no sacrifice in control, security or reliability.

- **File backup.** Real-time (not scheduled) backup for user files, with simple recovery
- **File sharing and collaboration.** Sync and share files internally and externally using virtually any device, while maintaining control over file access permissions
- **Admin control and security.** Keep your data safe and protected while consolidating two separate services for simpler management.
- **Business continuity and disaster recovery.** ShareSync keeps operations up and running across a number of scenarios, from stolen devices to ransomware outbreaks.
- **A Worry-Free Experience.** 24/7 admin phone support, a 99.999% uptime SLA and free onboarding assistance.

SEE HOW SHARESYNC COMPARES TO OTHER BACKUP AND FILE SHARING SOLUTIONS:

Type of Service	Example	Why ShareSync Wins
Backup solutions	Carbonite, Crashplan, Mozy	ShareSync gives backed up files added benefits of file sharing and collaboration. ShareSync also offers real-time backup which eliminates versioning gaps as file change multiple times during a day.
Free File Sync and Share Services	Dropbox, Box, OneDrive	ShareSync offers greater security, control, and integration while also adding the benefits of a complete file backup and restore solution.
Traditional sharing tools	Email and attachments, file servers, FTP servers, SharePoint	ShareSync is easy to use for employees and share recipients and offers more efficient sharing and collaboration.
Collaboration services available through other Cloud Suites	Microsoft Office 365 and OneDrive; Google Apps and Google Drive	ShareSync offers a high degree of security, control, and integration, plus a 99.999% uptime SLA.
